

mobilab

Travelling Exhibition

Rolling with science!

mobilab empowers children to explore and play with the laws of physics and gravity by designing, building and testing their own toy vehicle. A variety of inclined ramps, jumps and other physical obstacles entice children to create the best vehicle to meet each challenge. Design, imagine, assemble, inspect, test, observe, re-design and test again!

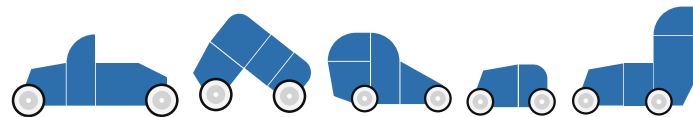

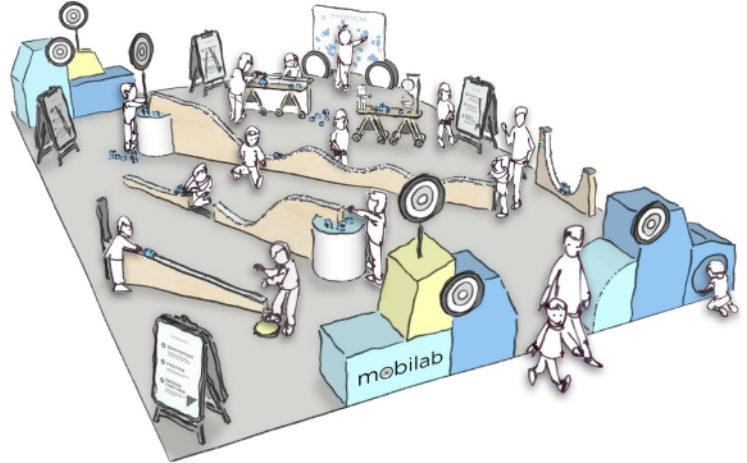

Specifications

Size
1000 to 1500 ft2 (90 to 140 m2).
